

AMENDMENT TO CLAIMS

Please amend claims 2, 10, and 13, and add new claims 14-20, all as shown below. All pending claims are reproduced below, including those that remain unchanged.

1. (Previously Presented) A method for providing access to services when a Web page is accessed by a user comprising the steps of:
 - receiving a URL code from a user;
 - retrieving a list of links from the Web page identified by the URL code;
 - displaying the list of links;
 - receiving a user selection of a given one of the links from the list of links;
 - retrieving a list of services which may be performed using the given link, the list of services hosted separately from the list of links; and
 - displaying the list of services.
2. (Currently Amended) The method of claim 1, wherein the step of displaying the list of services comprises the steps of:
 - displaying a standard list of services independent of the given link; and
 - displaying one of a number of link dependent services as identified by the given link.
3. (Original) The method of claim 2, wherein the standard list of services consists of one or more of the following:
 - printing the Web page identified by the given link;
 - faxing the Web page identified by the given link;
 - emailing the given link;
 - displaying the contents of the Web page identified by the given link; and
 - transmitting the given link as a pager message.
- 4-7. (Canceled).

8. (Original) The method of claim 1, wherein the list of services consists of one or more of the following:

- printing the Web page identified by the given link;
- faxing the Web page identified by the given link;
- emailing the given link;
- displaying the contents of the Web page identified by the given link; and
- transmitting the given link as a pager message.

9. (Canceled).

10. (Currently Amended) The method of claim 1, wherein the step of displaying the list of services comprises the steps of:

- displaying a standard list of services; and
- displaying a list of services dependent on a location of the user's communication ~~[[mobile]] device from a location of where the services can be performed relative to the user.~~

11-12. (Canceled).

13. (Currently Amended) The method of claim 1, wherein the step of displaying the list of services comprises the steps of:

- displaying a standard list of services; and
- displaying a list of services dependent on a characteristic of the user, wherein the user characteristics comprise one or more of the following:
 - user preferences specified by the user on the user's communications device;
 - type of communications device used by the user; and
 - cost of services for which the user will pay.

14. (New) The method of claim 1, further comprising ordering of the display of links by one of the following:

- number of times user has navigated to that link;
- number of links with the most duplicates on the website;

links that identify documents with largest content; and
links that have a larger size.

15. (New) The method of claim 1, wherein displaying the list of links further comprises scrolling down the list of links by a user for a list of links longer than the number of links that can be displayed to the user's communications device screen.

16. (New) The method of claim 1, wherein displaying the list of links further comprises displaying a button, which when selected displays additional screens of any additional links for a list of links longer than the number of links that can be displayed to the user's communications device screen.

17. (New) The method of claim 1, wherein displaying the list of links further comprises displaying a button, which when selected displays offsite links.

18. (New) The method of claim 1, wherein displaying the list of links further comprises displaying a button, which when selected displays the previous screen.

19. (New) The method of claim 1, wherein displaying the list of links further comprises displaying one or more of the following parsed from the Web page: phone numbers, addresses and email addresses.

20. (New) The method of claim 2, wherein dependent links can be one of owner dependent, format dependent and language dependent.
